

ARIF FAHMI BIN AHMAD IRWAN

AI & DIGITAL SYSTEMS | AUTOMATION DEVELOPER

Cybersecurity graduate from Universiti Tenaga Nasional (CGPA 3.74) with a strong interest in AI, automation and digital transformation. Developed practical AI and workflow solutions at Novartis using Python and Microsoft Power Platform. Experienced in connecting data, automating repetitive work and building secure, business-focused systems.

TECHNICAL SKILLS

- Python • Flask • SQL
- Copilot Studio • AI Builder
- Power Automate • Power Apps
- Azure AI Document Intelligence
- SharePoint • Power BI
- React • TypeScript • JavaScript
- Excel • Office Scripts
- Workflow & API integration
- Prompt engineering
- Cybersecurity & data governance

LANGUAGES

Malay — Native

English — C1 Advanced

Arabic — A2 Elementary

CERTIFICATIONS

- CCNA
- Ethical Hacking
- Introduction to Computing and Network Security

PROFESSIONAL EXPERIENCE

AI & Automation Solution Intern | Novartis

Jun 2026 – Present • Selangor, Malaysia

- Delivered three AI and automation solutions for finance, audit review and forecasting processes.
- Integrated Copilot Studio, AI Builder, Power Automate, SharePoint and Power BI to streamline business workflows.
- Reduced payment lookup time from ~15 minutes to under 30 seconds; achieved 82/82 correct extractions in a test sample.
- Built Python/Flask and React/TypeScript components with attention to data security and governance.

Treasurer | CLICQ UNITEN

2024 – Present

- Managed financial records, budgets, reconciliations and reporting for student organization activities.

Freelance Web Designer

2025

- Designed responsive, interactive websites with JavaScript, HTML and CSS.

EDUCATION

Bachelor of Cyber Security | Universiti Tenaga Nasional

Graduated 2026 • CGPA 3.74 • Dean’s List (6 semesters)

Foundation in Computer Science | UNITEN

GPA 3.93 • MUET Band 4.5

KEY STRENGTHS

- AI solution development
- Business process automation
- Data extraction and reporting
- Problem solving
- Stakeholder collaboration
- Secure system design

ACHIEVEMENTS

- UNITEN CTF — 2nd Runner-up
- IGOH2025 — Outstanding Achievement
- Student Academic Achievement Award

FOCUS AREAS

AI agents • Intelligent workflows • Digital systems • Cyber-threat detection

SELECTED PROJECTS

AI & AUTOMATION — NOVARTIS

POP Nexus — Proof-of-Payment Automation

Built an AI-assisted payment retrieval system that processes bank PDFs, extracts structured fields and enables natural-language searches with direct source-page links. Reduced lookup time from ~15 minutes to under 30 seconds.

Tools: Python • OCR • Azure AI Document Intelligence • Copilot Studio • Power Automate

Auditmatic — AI Reconciliation Review

Automated the interpretation and classification of reviewer notes, remediation decisions and structured reporting to Excel, SharePoint and Power BI.

Tools: Copilot Studio • AI Builder • Power Automate • SharePoint • Power BI

ForecastX — Cash Flow Forecasting Portal

Built a portal collecting 12-month cash-flow forecasts from five finance departments, consolidating data with variance tracking, audit trails and AI-assisted what-if analysis.

Tools: Python • Flask • React • TypeScript • openpyxl • Office Scripts

INDEPENDENT AI & SOFTWARE PROJECTS

Email-to-Database File Automation

Developed a workflow to retrieve files from email and store associated information in a database, reducing manual file handling.

AI Social Media Cyber-Threat Classifier | In Development

Developing an AI system to categorize social media posts according to whether they may indicate cybersecurity threats.

Additional academic projects

Honeypot for suspicious activity logging • Traffic volume prediction using machine learning • Digital forensic investigation response game.
